

# HELP YOUR DRIVERS WORK MORE SAFELY & EFFICIENTLY.

Introducing the new Reaching Pole, proven to enhance safety by reducing fall incidents and other hazards involving rear load, front load and roll off drivers.

Developed and tested by industry experts and waste collection drivers.

Distributed by Rumpke Hydraulics & Machining.

## IMPROVED SAFETY WITHIN YOUR REACH

After nearly two years in the making, more than 200 drivers from waste companies, like Rumpke Consolidated Companies, Inc. in Cincinnati, are using the Reaching Pole to prevent injuries resulting from climbing on trucks and containers and walking under raised truck tailgates.

- The Reaching Pole allows roll off drivers to position the tarp strapping on loads more efficiently to enhance load securement.
- The Reaching Pole is available in two sizes, a 4 foot to 8 foot pole for rear load trucks, and a 6 foot to 12 foot pole for front load trucks and roll off trucks.
- The Reaching Pole comes with interchangeable attachments including a hook, brush and scraper.
- The Reaching Pole is compliant with ANSI Standard 245.1 after completion of proper training.
